

Flavored Milk

Last Modified on 05/28/2020 11:32 am CDT

Flavored milk is only allowed for children six (6) years-old and up. However, at this time, there is no edit check in Minute Menu CX that identifies when flavored milk is served to children age four (4) and younger.

We strongly advise that you remove flavored milk from your list entirely. For more information, see [Remove Foods](#). If flavored milk is not removed, this edit check will need to be performed manually.
