There are two options for entering At-Risk After School (ARAS) meals in KidKare

- Enroll children, and take child-specific meal counts.
- Do *not* enroll children, and record meal count and attendance totals only.

Children are Enrolled

If children are required to be enrolled for an ARAS site (closed-enrolled), or if the site serves both regular and ARAS meals, the center can record meals, meal counts, and attendance just as other sites do. However, the child should be marked as **At-Risk** in the Child tab in the Manage Child Information window. The center license must also be set up for ARAS. See [Enroll Centers for ARAS](#) for more information.

Children are Not Enrolled

If children are not required to be enrolled, sites can use the ARAS-only features in [KidKare](#). This function should be used by those sites that claim At-Risk meals **only**. Sites that serve At-Risk and regular CACFP meals should enroll children.
